PROFESSIONAL SUMMARY

Highly motivated second-year B.Tech Computer Science student with a strong foundation in Data Structures, Algorithms, and full-stack web development. Experienced in building and integrating REST APIs across React/TypeScript frontends and Python/FastAPI backends, with hands-on exposure to SDLC and collaborative, Git-based development workflows. Proven problem-solving ability with 250+ LeetCode problems solved and a 103-day consistent coding streak. Eager to contribute to real-world software products in a collaborative engineering team.

SKILLS

Languages: C++, Python, JavaScript, TypeScript, SQL

Frontend: React.js, HTML5, CSS3, Vite

Backend & Database: FastAPI, REST API Development, MySQL, JDBC

Tools & Practices: Git, GitHub, VS Code, Eclipse, Figma, SDLC, Agile/Iterative Development, Debugging & Testing

Core Concepts: Data Structures & Algorithms, OOPs, DBMS, Agentic AI, RAG Basics

PROJECTS

AI Mock Interview Coach

React.js, TypeScript, Vite, Python, FastAPI, REST API

- Developed a full-stack AI-powered mock interview platform simulating technical and HR interviews through an AI interviewer, following standard SDLC practices.
- Built a responsive, user-friendly frontend using React, TypeScript, and Vite for an interactive interview experience.
- Designed and integrated a FastAPI backend with REST APIs to manage interview sessions, process user responses, and deliver AI-generated questions and feedback.
- Implemented real-time interview flow, AI-based evaluation, personalized feedback, and performance tracking; debugged and tested end-to-end session logic.

GuestLog — Visitor Management System

Java Swing, MySQL, JDBC

- Developed a desktop-based visitor management system for visitor registration and real-time tracking, using Git for version control throughout.
- Implemented a secure admin authentication mechanism and visitor entry-exit workflows.
- Managed backend data synchronization by executing CRUD operations via JDBC and MySQL database integration; debugged cross-platform rendering issues.

Password Generator Web Application

HTML5, CSS3, JavaScript

- Developed a responsive password generator with customizable length configurations and rule sets.
- Implemented secure, cryptographically random password generation logic with native copy-to-clipboard functionality.

EDUCATION

Sagar Institute of Science and Technology (SISTec), Bhopal

Bachelor of Technology, Computer Science Engineering — CGPA: 7.5

Aug 2024 – Jun 2028

Nagendra Jha Mahila College, Darbhanga

Higher Secondary (XII) — 75.5%

Apr 2021 – Mar 2023

Rose Public School, Darbhanga

Secondary (X) — 68%

Mar 2019 – Mar 2021

CERTIFICATIONS

- Build with Retrieval-Augmented Generation (RAG): AI Workshop & Competition — SISTec (May 2026)

ACHIEVEMENTS

- Solved 250+ LeetCode problems focusing on advanced Data Structures and Algorithms.
- Maintained an active 103-day consecutive coding streak on LeetCode.
- Earned the official LeetCode 100 Days Badge for consistency.
