SUMMARY

Highly motivated Second-year B.Tech student with a strong foundation in Data Structures, Algorithms, and Full-Stack Web Development. Passionate about leveraging modern technologies to build scalable web applications and AI-driven solutions. Proven problem-solving capabilities with 250+ solved LeetCode problems and a consistent 103-day coding streak. Proficient in developing robust backends using Python and FastAPI, creating dynamic user interfaces with React and TypeScript, and implementing efficient databases to deliver seamless end-to-end user experiences.

EDUCATION

Sagar Institute of Science and Technology (SISTec) Bachelor of Technology (CGPA: 7.5)	Bhopal Aug 2024 – Jun 2028
Nagendra Jha Mahila College Higher Secondary (XII) – 75.5%	Darbhanga Apr 2021 – Mar 2023
Rose Public School Secondary (X) – 68%	Darbhanga Mar 2019 – Mar 2021

TECHNICAL SKILLS

Languages:	C++, Python, JavaScript, SQL, TypeScript
Frontend:	React.js, Vite, HTML5, CSS3
Backend & DB:	FastAPI, MySQL, JDBC
Tools & Platforms:	Git, GitHub, VS Code, Eclipse, Figma
Core Concepts:	Data Structures & Algorithms, Object-Oriented Programming (OOPs), DBMS, Agentic AI, RAG Basics

PROJECTS

AI Mock Interview Coach	<i>React.js, TypeScript, Vite, Python, FastAPI, REST API</i>
--------------------------------	--

- Developed a full-stack AI-powered mock interview platform that simulates technical and HR interviews using an AI interviewer.
- Built a responsive frontend using React, TypeScript, and Vite, delivering a clean and interactive interview experience.
- Implemented a FastAPI backend to manage interview sessions, process user responses, and integrate AI-generated questions and feedback.
- Designed features such as real-time interview flow, AI-based evaluation, personalized feedback, and interview performance tracking.

GuestLog Visitor Management System	<i>Java Swing, MySQL, JDBC</i>
---	--------------------------------

- Developed a desktop-based visitor management system for visitor registration and real-time tracking.
- Implemented secure admin authentication mechanism and visitor entry-exit workflows.
- Managed backend data synchronization executing CRUD operations via JDBC and MySQL database integration.

Password Generator Web Application	<i>HTML5, CSS3, JavaScript</i>
---	--------------------------------

- Developed a responsive password generator with customizable length configurations and rule sets.
- Implemented secure cryptographically random password generation logic along with native copy-to-clipboard functionality.

CERTIFICATIONS

- Build with Retrieval-Augmented Generation (RAG): AI Workshop & Competition – SISTec (May 2026)

ACHIEVEMENTS

- Solved 250+ LeetCode problems focusing on advanced Data Structures and Algorithms.
- Maintained an active 103-day consecutive coding streak on LeetCode.
- Earned the official LeetCode 100 Days Badge badge for consistency.
